

# PAULO GOMES

## Software Engineer

### RESUME

Computer scientist and Software Engineer with knowledge in several areas of software development, focusing on front-end engineering, with knowledge in technologies such as: React, Next, React Native, Flutter, Node js and Typescript.

### EXPERIENCE

#### Internship | NCA - UFMA (2018-2020)

- Development of intelligent systems based on AI and Machine Learning/Deep Learning to predict data related to lawsuits (propensity for lawsuits), so that the company could protect itself and improve its service in areas where there was great dissatisfaction with the service. For this, I used technologies such as: Python, XGBoost, Pandas, Keras and Tensorflow.

#### Software engineer | Pulse, Grupo Mateus (2020-2022)

- Developed and proposed efficient solutions for a scalable mobile sales and marketing application in React native that surpassed the mark of 1 million users.
- I took the lead in the development of a **design system** for the company's mobile applications, along with robust documentation using the technologies: **React Native**, **typescript**, **testing library** and **storybook.**, facilitating the development of other company applications.
- I supported microservices in **NodeJs**.
- I developed internal web projects to help the company manage contracts with its suppliers, through web solutions in React, exponentially increasing the efficiency in the management processes of these contracts.

#### Software engineer | Take blip (2022-2023)

- I developed several modules in a **micro-frontend** architecture using **React** and **Typescript**, leading a development team and leading the migration of some modules to a new structure. Promoted the personal development of other team members by transferring knowledge, clean code and good practices through talks and code reviews.

## Software engineer | Juvo

(2022-current)

- I developed new functionalities in a Backoffice Project using React, adding value to the company and facilitating the demand of the operational sector.
- Developed new features for the company's official applications, which manage loans and users, using React, Typescript and Flutter.

## EDUCATION

2013-2015 | IT technician

Federal institute of Maranhão

2016-2021 | Bachelor in Computer Science

Federal University of Maranhão

## SKILLS

- React
- Typescript
- React Native
- Javascript
- Storybook
- Jest
- Testing library
- Flutter
- Clean code
- SOLID
- Microservices
- Azure
